

AutoCAD Drafter Certificate Program

Introduction

- The AutoCAD Drafter Certificate Program is a beginner-friendly course that teaches how to make technical drawings using AutoCAD software.
- It focuses on basic 2D drafting skills used in engineering, architecture, and construction fields.
- Students learn how to create accurate and neat design drawings on a computer.

Learning Outcomes

- Learners can make clear and accurate 2D drawings using AutoCAD software.
- They understand basic drafting rules and design concepts used in engineering and construction.

Why Choose QPAcademy ?

- Industry-Focused BIM Training with real-world project. workflows
- Expert Mentors with practical experience in global AEC projects
Hands-On Learning using Autodesk Revit, Navisworks & BIM tools
- Career Support & Skill Development to help students grow professionally.

Essential Course Details

90 Hrs. Training

- 1 Hrs. Daily on weekdays and
4 Hrs. on one weekend
1 Hrs. Offline class

Target Audience:

The AutoCAD Drafter Certificate Program is suitable for students, beginners, and fresh graduates who want to start a career in drafting and design. It is also helpful for engineers, architects, and technicians who want to improve their AutoCAD skills. Anyone interested in learning technical drawing and design can join this program.

Training Includes:

The training includes basic to advanced AutoCAD tools for creating 2D technical drawings. It covers drafting techniques, dimensioning, layer management, and drawing standards. Students also get hands-on practice with real-world design exercises.

Course Certificate:

Upon completion of the Autodesk Course. Completion Certificate will be provided.
