

## Revit Fundamental - All Disciplines

### Introduction

- The Revit Basic course provides a comprehensive understanding of the essential features and tools within the Revit software.
- Participants learn to create and manage building information models (BIM) to design and document projects efficiently.
- Through hands-on exercises and practical examples, students gain the skills necessary to produce high-quality designs using Revit

### Learning Outcomes

- Understanding of the fundamental features and tools offered by the Revit software.
- The course focuses on developing participants' proficiency in creating and managing building information models (BIM) using Revit.
- Effective Documentation and Collaboration skills.

### Why Choose QPAcademy ?

- Industry-Focused BIM Training with real-world project. workflows
- Expert Mentors with practical experience in global AEC projects Hands-On Learning using Autodesk Revit, Navisworks & BIM tools
- Career Support & Skill Development to help students grow professionally.

#### Essential Course Details

30 Hrs. Training

- 1Hrs. Daily on week days and  
4Hrs. on one weekend  
1 Hrs. Offline class

#### Target Audience:

This course is ideal for beginners, CAD drafters, project coordinators, architects, and project managers. Managers, as well as engineering and architectural final-year students seeking practical training in Revit.

#### Training includes:

- Get familiar with Revit's basic tools.
- Creating Project Organisation
- Working with parameters
- Setting up levels and grids,
- understanding modified tools, and more fundamental features in Revit.

#### Course Certificate:

Upon completion of the Autodesk Course. Completion Certificate will be provided.
