Bim Professional Diploma Programme.

Introduction

- The BIM Professional Diploma Programme is a specialized course focused on Building Information Modeling (BIM) technologies used in the construction industry.
- It provides training in 3D modeling, project coordination, and. digital construction management tools.
- This programme helps learners build strong career opportunities in architecture, civil engineering, and construction fields.

Learning Outcomes

- After completing the BIM Professional Diploma Programme, learners are able to create and manage 3D BIM models for construction projects effectively.
- Students also develop the ability to improve construction. planning, efficiency, and collaboration across project teams.

Why Choose QPAcademy ?

- Industry-Focused BIM Training with real-world project. workflows
- Expert Mentors with practical experience in global AEC projects Hands-On Learning using Autodesk Revit, Navisworks & BIM tools
- Career Support & Skill Development to help students grow professionally.

Essential Course Details

- 300 Hrs. Training
- 1 Hrs. Daily on weekdays and
  4 Hrs. on one weekend
  1 Hrs. offline class

Target Audience:

The BIM Professional Diploma Programme is designed for students and professionals in architecture, civil engineering, and construction management.It is ideal for individuals who want to build careers in digital construction and BIM technologies. Fresh graduates and working professionals looking to upgrade their technical skills can also benefit from this programme.

Training Includes:

The BIM Professional Diploma Programme includes hands-on training in BIM software like Revit, Navisworksand AutoCAD.It covers 3D modeling, project coordination, clash detection, and construction documentation.
Students also receive practical exposure to real-world projects and industry workflows.

Course Certificate:

Upon completion of the Autodesk Course. Completion Certificate will be provided.
